Mountains of paper invoices, supplier inquiries and disputes, inflexible accounting systems—any one of these can slow productivity in your company’s Accounts Payable (AP) department.

Dolphin’s Vendor Portal powered by Taulia® is a powerful Web application that addresses these issues and more. Tightly integrated with SAP®, your accounts payable application, the vendor portal provides your suppliers with the means and visibility to submit invoices, have a real-time view of the process, search and retrieve purchase orders, learn the payment date, and even trigger or negotiate early payment for discounts. You’ll see immediate benefits in heightened efficiency to help save time and reduce costs that help improve cash flow.

SAVE TIME AND INCREASE EFFICIENCY
For companies invested in SAP systems, the vendor portal gives your suppliers easy and automated access to the status of their invoices, approvals and payment. Dolphin accomplishes this through its proven Process Tracking System for Accounts Payable (PTS-AP), an SAP certified solution that automates the receipt of invoice documents and workflow within your SAP application. With a simple Web browser and secure sign-on, your vendors can:

• Search and view the status of their invoices
• Search and retrieve purchase orders (POs)
• Negotiate discounts for early payments

The vendor portal reduces time-consuming inquiries because your suppliers have access to full invoice data and status with a simple click. They can see whether an invoice has been paid or when it is scheduled for payment, which saves your AP staff time responding to individual inquiries. Suppliers may also submit e-invoices, convert POs into invoices, and even update an address in the master vendor profile - one less task for your staff to manage. Suppliers receive comprehensive information in real-time. Even non-SAP users can access invoices using email and a Web-based interface.

Giving your suppliers access to account information significantly reduces telephone and email exchanges, inaccuracies and the time it takes for your staff to respond to account inquiries and resolve disputes. Through vendor self-service, we free your AP staff to focus on higher-priority tasks.
ENJOY COST SAVINGS, IMPROVE CASH FLOW

Traditional accounting systems lack flexibility and make it difficult to change payment terms. Many companies miss out on significant discounts for early payment as a result.

Dolphin’s innovative vendor portal ensures that your company is equipped to take advantage of early or accelerated payment discounts based on a sliding scale - a process commonly called ‘Dynamic Discounting’.

As the buyer, Dolphin’s Vendor Portal allows you to determine the discount. Suppliers can opt to accept the discount amount and select the desired payment date for approved invoices - or wait and get paid in full. The process is easy to manage and seamless for both sides. The results are improved AP department productivity and better cash flow management, which truly benefit both buyers and sellers.

Overall, the Dolphin Vendor Portal provides a valuable service for your suppliers and results in substantial time and cost savings for you. Everyone benefits from accounts payable self-service. When will you begin?

EASY IMPLEMENTATION

- Certified SAP add-on installed locally via simple transport
- Hosted portal communicates securely with add-on
- No additional middleware required
- No special infrastructure or hardware required

ABOUT DOLPHIN

Dolphin leads the way in SAP business performance improvement and is the one partner that manages both data and processes.
